- 1 Inspection boat
- Underwater injection treatments where needed

Lake Johanna

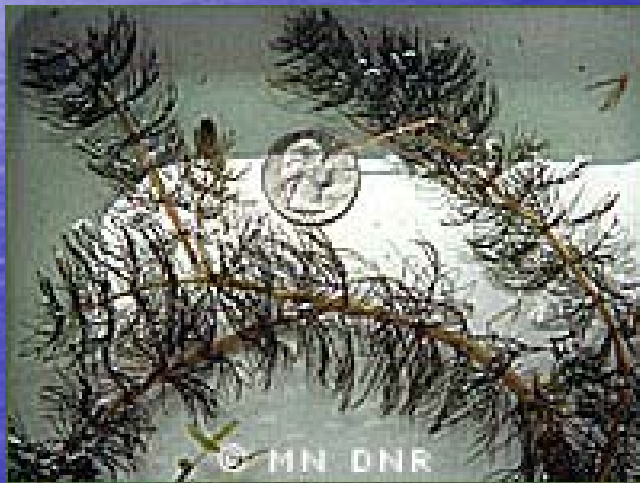

Curly-leaf Pondweed
first found in Minnesota in 1910

Vallisneria

Northern Watermilfoil

2011 treatment plan

- Pretreatment survey before 1st treatment
- Based upon Pretreatment survey, may come out to treat the Algae first
- First Herbicide application will focus on Northern Watermilfoil, Vallisneria, and Curlyleaf pondweed as needed.
- Pretreatment survey before 2nd treatment
- Second application for Algae and Northern Watermilfoil regrowth.

Commitment

- Over 90% of our customers are repeat.
- We will work with you to ensure a timely and effective treatment.
- Conditions change from lake to lake and day to day. We try to apply our herbicides in the best conditions, for the best results.

Thank You

- Thanks for the opportunity to meet with you.
- Look forward to serving you this season.
